

# The BioTrust Collection

at PENN MEDICINE

## The OCRC Tumor BioTrust Collection

The OCRC Tumor BioTrust collects various cancer specimens from all cases of gynecologic cancers as well as benign conditions. We handle collection, processing, storage and distribution of primary and recurrent tumor samples including the samples collected from rapid autopsies. All samples collected have clinical annotation including demographic patient profiles, pathological & clinical notations, treatment history, and detail disease information.

Samples we offer:

- Fresh & Frozen Tissue
- Enzyme Digested Tumor Cells
- PBMCs
- Serum & Plasma
- Ascites cells & supernatant
- OCT
- FFPE & TMA samples
- Rapid Autopsy Samples
